■ OBJECTIVES:

- Identify appropriate nutritional advice for mothers of multiples and be aware of the potential pitfalls in relation to false positive.
- Diagnosis of preeclampsia and other medical issues
- Apply the ICD-10-CM guidelines for obstetrical services to common clinical practice
- Understand how to report multiple obstetrical conditions and complications
- Understand the link between clinical documentation and code selection including the information necessary to assign appropriate ICD-10 codes
- Apply the ICD-10 guidelines for reporting gynecological conditions
- Recognize the ICD-10 coding options for key office-based gynecological conditions and services
- Explain the documentation requirements for selecting the most appropriate ICD-10 code
- Identify appropriate clinical management of at-risk patients in order to prevent Rh D alloimmunization
- Discuss current ACOG guidelines regarding Rh D allo-immunization
- Identify ‘the new and the different’ in the world of red cell allo-immunization
- Describe the physiology of intra-partum fetal ECG analysis
- Cite available safety and efficacy data for fetal ECG analysis
- Discuss the STAN clinical trial
- Advise their patients when and why to seek the services of a reproductive endocrinology and fertility specialist

DISCLOSURE OF FACULTY AND INDUSTRY RELATIONSHIPS

In accordance with College policy, all faculty and planning committee members have signed a conflict of interest statement in which they have disclosed any significant financial interests or other relationships with industry relative to topics they will discuss at this program. At the beginning of the program, faculty members are required to disclose any such information to participants. Such disclosure allows you to evaluate better the objectivity of the information presented in lectures. Please report on your evaluation from any undisclosed conflict of interest you perceive.
